WILLIAMS' "SUPERSOCKET" WRENCHES

Chrome-plated over Nickel

MIDGET PATTERN—1/4" Square Drive

(Previously 9/32" Sq. Drive—Now Obsolete)

Hex—SOCKETS—Square

Williams' Midget Electrical Sockets are unequalled in cramped quarters and for delicate adjustments. Invaluable time-savers on Generators, Wiring-connections, Radios, Carburetors, etc.

Their thin, straight walls enable them to operate readily on troublesome little jobs where no ordinary socket or wrench could even get in and grip the nut. Furnished with hex and square openings as listed.

Accurately made from Chrome-Molybdenum steel and heat-treated in electric furnaces. Uniformity of product and tough, dependable strength are assured.

All Sockets packed 6 in a box.

WILLIAMS' "SUPERSOCKET" WRENCHES

Chrome-plated over Nickel

TORQUE "MEASURRENCH" No. S-57

REVERSIBLE RATCHET

WITH R. H. TORQUE INDICATING SIGNAL

Standard Pattern—1/2" Square Drive

PATENTED

List Price, \$26.00

Closely limited torque application is essential in Automotive, Aviation and Diesel motors; also for many industrial appliances. Such fine adjustments make an efficient indicator of torque a vital necessity.

Williams' Ratchet "Measurrench", 19 1/2" long, is the most durable and efficient tool for torque indicating service on the market. It can be applied to ANY detachable Socket having 1/2" square drive-opening.

The wrench may be used in two ways:—

BY SIGHT READING—An easily read scale on the handle indicates applied tightening pressures from 20 to 200 foot-pounds.

BY SOUND READING—A sharp sound signal is given for any desired torque from 35 to 200 foot-pounds, by setting the simple sound device.

Right-hand torque only is measured, but action of wrench reverses instantly for left-hand turning.

 Williams' twin-double-tooth oscillating pawl provides constant engagement with TWO teeth of the 36-tooth ratchet-gear, in both ON and OFF turning. Consequently, the wrench operates readily when it swings only 12°—just one-thirtieth (1/30) of a full turn.

• With each wrench is supplied a chart giving the foot-pounds tension for connecting rods, cylinder heads, etc., of all popular cars and trucks, as recommended by their manufacturers.

Fully Guaranteed

An attractive discount is given; see your jobber.

SET 50—List, \$48.54

Complete—15 Pieces

Total Weight, 28-3/4 lbs.

10 Sockets with 12-point openings, 1-1/16, 1-1/8, 1-3/16, 1-1/4, 1-5/16, 1-3/8, 1-7/16, 1-1/2, 1-5/8 and 1-3/4".

5 Accessories, Nos. H-20A, H-50, H-110, H-115 and H-140.

SET 51—List, \$30.54

Without H-50 and H-140

13 Pieces

Contains the same assortment of Sockets and Accessories as Set No. 50 excepting that Ratchet H-50 and Universal Joint H-140 are omitted.

For Bus, Truck and other severe service requiring tools of trim design, yet of ample strength, these Heavy Duty Sets are unusually handy, efficient and economical.

Twelve-point Sockets cover all U. S. Std. Nuts 5/8 to 1"; all Cap Screws 7/8 to 1-1/8"; all S. A. E. Std. Nuts 3/4 to 1-1/8"; all Amer. Std. Regular and Jam Nuts 3/4 to 1"; Light and Castle Nuts 3/4 to 1-1/8".

The Handles and Parts are easily connected with the Sockets (and as readily disconnected), but are held firmly against unintentional displacement. See previous page.

An attractive discount is given; see your jobber.

WILLIAMS' IMPROVED HOLLOW-SCREW WRENCH SET No. AL-100

Williams' detachable "Supersocket" Bits and Parts provide unusually efficient wrenches for all hex socket hollow-screws in table below.

"Superratchets", B-51 and S-51, are instantly reversible.

Genuine Williams' quality. Tough Chrome-Alloy Steel, accurately machined and heat-treated in electric furnaces, chrome-plated, polished.

WILLIAMS' "SUPERSOCKET" WRENCHES

Chrome-plated over Nickel

EXTRA HEAVY DUTY PATTERN

1" Square Drive

SOCKETS

12-Point
Openings

Williams' Extra Heavy Duty Sockets provide sturdy strength for the hardest service. They are cross-drilled to receive Sliding Handle, bringing same close to the work. Minimizes tendency to tip when socket is used near the end of handle. Rotates nuts where handle swing is only 30°.

The "Lock-Socket" device provides a positive lock between sockets and attachments. To release "Lock-Socket" press button on socket and pull. Eliminates danger of sockets becoming detached in service. High tensile steel, heat-treated in electric furnaces. To use Extra Heavy Duty Sockets (1" square female drive) with Heavy Duty Handles and Parts (3/4" square male drive), use Adapter HNX-130, pages 10 and 21.

WILLIAMS' "SUPERSOCKET" WRENCHES

Chrome-plated over Nickel

REFRIGERATION SERVICE SET No. R-19

LIST PRICE, Complete—19 Pieces—\$18.50

In Strong Steel Case, 7-3/4 x 3-3/8 x 1-1/4"

Total Weight, 2-3/4 lbs.

This handy, compact assortment of "Supersocket" Wrenches has been carefully selected for servicing and repairing all makes of Electric Refrigerators. 14 slim, thin-wall Chrome-Alloy "Supersockets" and 5 Accessories, including a specially designed Reversible Ratchet; heat-treated and chrome-plated.

Contents of Set

- 5 Midget "Supersockets"—9/32" square drive
Square Openings—3/16, 7/32, 1/4"
8-Point Openings—5/16 and 3/8"
- 3 Bantam "Supersockets"—3/8" square drive
12-Point Openings—7/16, 1-2, 9/16"
- 5 Packing Gland Nut "Supersockets"
9/32" square drive
- 1 Kerotest Valve Packing Nut "Supersocket"
Oval Opening 1/2 x 3/8"—9/32" sq. drive
- 1 Reversible "Superratchet" complete
3/8" sq. male and 1/4" sq. female ratchet drive
Also, 3/16 and 1/4" sq. drive holes in handle end.
- 1 Plug Adapter—1/4 and 9/32" square
- 1 Sliding "T" Handle, 4-1/2"; 9/32" square drive
- 2 Extension Bars, 5-1/2 and 6" long
3/8" and 9/32" square drive respectively

Fully Guaranteed

WILLIAMS'

REFRIGERATION SERVICE TOOLS

WHEEL PULLER No. 5

This Williams' Wheel Puller is a simple efficient tool developed for the many pulling jobs in Refrigeration Service, such as flywheels, fans and pulleys. It can also be used for many pulling jobs on electric motors, etc.

The body, forged from high tensile steel, has four sockets into which either two or all three of the arms may be placed in various positions, providing a combination of grips. Flywheels with even or odd numbers of spokes are pulled with equal ease. All three arms are necessary for odd-spoked wheels, while only two are needed for an even number of spokes. The pulling capacity is 7" diameter.

Easily adjusted arms, processed from alloy steel, are held in place by an endless spring. They are instantly reversible by merely turning the arm in the socket for either internal or external pulling. This feature eliminates the necessity of removing or repositioning the arms.

The hex head of the power screw, on which any convenient wrench can be used, has a knurled band to facilitate rapid hand turning. Its cone point fits into the center-hole of the shaft end.

THE "SUPERECTOR" REVERSIBLE RATCHET WRENCH With Quadruple Pawls & Drop-Forged Handle

PAT. PENDG.

Fully Guaranteed

THE "SUPERECTOR" is built for rapid operation in the most severe service such as bridge, structural and other work requiring fast, dependable tools of rugged strength. Instantly reversible in action. Ample leverage for the hardest jobs. Finished in light gray enamel.

Only WILLIAMS' "SUPERECTOR"
offers all the following advantages.

QUADRUPLE PAWLS. Two pawls engaging 2 teeth for both ON and OFF rotation of nuts, providing increased bearing and strength. Made of hardened tool steel designed to provide straight compressive loading on the pawls and teeth—the sturdiest construction possible.

HANDLE Drop-Forged (not cast) from special high grade steel.

GEAR TEETH. 20 teeth in ALL socket gears instead of the usual 16 teeth. All wrenches will rotate with only an 18° swing of the wrench as against 22-1/2°.

SHIFTER. When in neutral, completely disengages all gears for easy insertion and removal of the Socket. A flip of the lever reverses the action of the wrench.

COLLAR for retaining socket has a projection on inner surface which registers easily with a corresponding slot in the neck of the Socket. No fumbling for set screw "spots."

CAP, securely seated in wrench head is fastened with one screw, fully enclosing mechanism and permitting easy removal.

12-POINT BOX "SUPERRENCHES" (Chrome-Molybdenum)

No. 6723
to 6727

No. 7723 to 7039A

These strong, tough "Superrenches" have thin head walls for use in close quarters. The 12-point openings grip hex nuts on six sides, preventing all slipping and rounding of the nut's corners.

GENUINE "Superrenches", drop-forged from Chrome-Molybdenum, heat-treated, chrome-plated.

Also finished in baked gray enamel at lower price; details on request.

Fully Guaranteed

† Supplied with "striking-face" for sledging service at extra charge.

WILLIAMS' "SUPERRENCHES"

(Chrome-Alloy)

OPEN END-BOX PATTERN for Close Quarters

Fully Guaranteed

These long, slender "Superrenches", combining two styles of head, are designed especially for use in close quarters.

Open end is thin, with slim jaws and opening at angle of 15°—the most efficient ever devised for this type of wrench-head.

Box end, with 12-point opening and thin walls, is offset from plane of handle; see illustration.

Same size opening in both heads; where one can not operate, the other will. Each rotates hex nuts when the wrench can swing only 30°—less than 1/10 of a full turn.

Drop-forged from tough Chrome-Alloy steel, heat-treated and chrome-plated, with faces of open end buffed bright.

No.	Nominal Openings	U.S. Std. Nut	Hex Cap Screw	S.A.E. Std. Nut	Amer. Std. Nut	Length, Approx.	LIST PRICE

WILLIAMS

SUPERIOR DROP-FORGED TOOLS

"SUPERRENCH"

(Chrome-Molybdenum)

ENGINEERS' WRENCHES

15° Angle, Double Head

"Superrenches" grip the tightest nuts—and MAKE them yield. No bulk in the head to interfere where clearance is limited. The jaws are long, thin and pointed, but the strength is the greatest ever put in a thin wrench. Chrome-Molybdenum steel, the best material for the purpose ever produced, makes "Superrenches" absolutely dependable—no matter how hard the work.

The 15° angle of opening is the most efficient that can be devised. With it, a hex nut can be rotated completely where the wrench can swing only 30°.

Drop-forged, heat-treated and chrome-finished.

For Sets, see page 40.

These handy compact Sets of "Superrenches" provide easy and efficient tappet adjustment. The individual wrenches are fully described on previous page.

SET No. 1032. Six "Superrenches", 2 each of Nos. 1090, 1090D and 1092F, covering every tappet size from 7/16 to 11/16"; services 80% of all cars, buses and trucks.

SET No. 1042. Includes 8 "Superrenches", 2 each of Nos. 1090, 1090D, 1092F and 1094, and provides most comprehensive tappet service. Since it covers every tappet size from 7/16 to 7/8", it cares for practically all cars, buses and trucks. An ideal set for the automobile mechanic.

SET No. 1063. Six "Superrenches", 2 each of Nos. 1090D, 1092F and 1094, covering every tappet size from 1/2 to 7/8"; services 80% of all cars, buses and trucks.

Fully Guaranteed

MIDGET "SUPERRENCHES" (Chrome-Molybdenum)

Nos. 1106-1109

Nos. 1112-1132

Midget "Superrenches" are unusually thin and slim, but surprisingly tough and strong. On magnetos, generators, wiring-connections, carburetors, radios, all delicate adjustments and in the closest quarters, these wrenches are invaluable.

Made in two styles as follows:—

Nos. 1106 to 1109 have two different openings at 15° angle.

Nos. 1112 to 1132 have both openings in each wrench of the same size, *but at different angles (15° and 75°)—where one head cannot operate, the other will.*

Genuine "Superrenches," Chrome-Molybdenum steel, heat-treated, chrome-plated heads buffed.

Supplied individually and in handy Sets.

Fully Guaranteed

WILLIAMS

SUPERIOR DROP-FORGED TOOLS

"SUPERRENCH"

(Chrome-Molybdenum)

CONSTRUCTION WRENCHES—15° Angle

Particularly serviceable on heavy automotive work requiring long leverage, such as Anchor Nuts, Bendix Brakes—Axle-shaft Nuts—Bumper Bolts and Nuts, Bus and Truck—Frame Members—King-bolts and Nuts—Springclip ("U" Bolt) Nuts—Spring-shackle Bolts and Nuts—Tire and Luggage-carrier Bolts and Nuts, Bus and Truck—etc., etc.

These wrenches also meet the needs of structural workers efficiently. The slim design provides ample strength and leverage without unnecessary weight and bulk. Substantial bearing on square nuts.

The long handle is round for the greater part of its length, with tapered end for easy insertion into bolt holes when bringing them into line.

Furnished heat-treated and finished in baked gray enamel all over.

Fully Guaranteed

WILLIAMS

SUPERIOR DROP-FORGED TOOLS

"SUPERRENCH"

(Chrome-Molybdenum)

STRUCTURAL WRENCHES—Straight Opening

Made especially to meet the needs of structural workers; the slim design provides ample strength and leverage without unnecessary weight and bulk.

The long, narrow jaws provide substantially full bearing on square nuts. The round handle has tapered end for easy insertion into bolt holes when aligning same.

The abrupt offset and angle of handle provide for clearance of obstructions and safety to the operator's hands. The wrench is particularly well balanced. When thrust into scabbard or belt-loop, the "step-up" of the round above the flat part of handle acts as a stop, yet is readily released.

Furnished heat-treated and finished in baked gray enamel all over.

Fully Guaranteed

WILLIAMS

SUPERIOR DROP-FORGED TOOLS

"SUPERRENCH"

(Chrome-Molybdenum)

STRUCTURAL BOX PATTERN—12-Point Openings

Designed for greater safety in structural work, the 12-point offset head gives maximum clearance and insures a firm hold on nut. Long tapered handle provides ample leverage and can be inserted into bolt holes for alignment. Heat-treated and finished in baked gray enamel.

No.	For U.S. Std. Nut; Size Bolt	Nominal Openings	Extreme Length, Approx.	Head		Handle Offset		Price Each

SUPERIOR DROP-FORGED TOOLS

"SUPERRENCH"

(Chrome-Molybdenum)

ADJUSTABLE HOOK SPANNER SET No. 1400

This Set covers a wide field of usefulness and is especially serviceable in adjustments to—

Exhaust Manifold Gland Nuts,
Differential Pinion Gear, Rear Axle Shaft Bearings
Rear Wheel Bearings, Water-Pump Packing Nuts, etc.

Three sizes of Spanners offer an unusual combination of strength and ready adjustment, fitting all rounds from $3/4$ to $4-3/4$ " diameter.

Drop-forged from Chrome-Molybdenum steel, heat-treated and Chrome-plated, face of jaw and raised part of handle buffed bright.

WILLIAMS' "SUPERRENCH"

(Chrome-Molybdenum)

OPEN-BOX PATTERN

For Refrigeration Service and
Water Pumps on Cars, Buses and Trucks

Single Head

Double Head

SET No. 8960
Double Head Pattern

LIST PRICE, \$9.35

In Leatherette Roll

5 "Superrenches"

10 Different Openings

For garages and service stations. One each
Nos. 8960, 8960B, 8962, 8962D and 8966
cover practically all cars and trucks.

Thin heads and narrow jaws permit easy operation in close corners. 12-point openings turn nuts readily where the "Superrench" can be swung only 30°. Their gripping power is more than double that of ordinary wrenches—will not slip.

Especially efficient on Refrigerator Flared Nuts.
Heat-treated, chrome-plated heads buffed bright.

Fully Guaranteed

WILLIAMS' "SUPERRENCHES"

(Chrome-Molybdenum — Chrome Plated)

FOR FORD CARS AND TRUCKS

Length, 11-1/2" Offset, 3"
Heat-treated; Chrome-plated.

Nos. S-231 and
1981-A

For ALL Ford "V8"
Connecting Rods

Spin nuts till engaged (short arm for lever); reverse
wrench and tighten (long arm for lever).

No. S-231 — List Price, \$2.00. Hex Openings 7/16 & 7/16.
Services Ford V-8, 60 HP, 1937-'40.

No. 1981-A — List Price, \$2.15. Hex Openings 9/16 & 9/16.
Services ALL Ford "6"; V-8, 85 HP, and Mercury. Also serv-
ices battery ground strap nut all Ford V-8 85 HP, 1935-'36.

No. SV-238

List Price, \$1.50

For All Ford "V-8", 1937

Battery Clamp Nuts

This thin-wall socket wrench
avoids damage to battery casing.

Hex Opening, 9/16"
Extreme Length;
Socket to Handle, 7"
Handle, 4-1/2"

No. S-243, List Price, \$2.00
Hex Openings, 21/32 & 21/32"
Length, 11-1/2". Offset, 3"

For Ford
"V-8" 60 H. P.
Motor, 1937-'40
Main Bearings

Specially thin sockets for all main bearing ~~sockets~~.

For All Ford "V-8",

1937 to 1942

Distributors

No. SV-244, List Price, \$1.75
12-Point Openings, 1/2 & 1/2"
Length, 9". Offset, 2-1/4"

Specially offset to clear fan-belt. A big time-saver in servicing
distributors on all Ford "6"; "V-8," 1937-'42; Mercury; Lincoln
Zephyr, 1937-'42.

No. 1966 — For Ford Crankcase Drain Plug

List Price, \$2.00
Opening, 2". Length, 11"

Required for ALL 1939-'42 Ford V-8 and Mercury cars.

No.
1984X

For
Ford
Brakes

List Price, \$2.05

8-pt. Openings, 7/16 and 1/2"—Length 11-1/4"

The only Wrench required for adjusting brakes on Ford "A,"
"B," ALL V-8, 1932-'38 cars; also "AA" and V-8 trucks.

No. 1956 — List \$3.00. "L" Socket Wrench; 12-pt. opening 3/4",
length 11". For Rear Main Bearing, Ford "A" cars and trucks.

WILLIAMS' "SUPERRENCHES"

(Chrome-Alloy—Chrome Plated)

FOR MAIN BEARINGS

List Price—\$3.15

Offset to clear obstructions. Length, 15".

No. 1955—12-Point Openings $5/8$ & $3/4$ "

Serves all Chevrolet, 1931-'32-'39 and '40 models.

FOR STARTER AND MANIFOLD

No. 1960

List
Price
\$1.55

12-Point Openings, $9/16$ & $5/8$ "—Length, 7"

For starter and manifold nuts, ALL models Chrysler and Dodge; all models DeSoto and Plymouth thru 1940.

No. 1961

List
Price
\$1.55

12-Point Openings, $5/8$ & $3/4$ "—Length, 7-1/2"

For starter nuts, ALL Chevrolet 1930 to '42.

FORD CRANK RATCHET SOCKETS

(Chrome-Alloy—Cadmium Plated)

For ALL Ford Cars and Trucks 1928-'42

Serves lower fan-pulley nut, necessary in dropping oil pan, without removing radiator. For use with regular Ford starting crank.

No. S-239—List Price, \$1.80

Opening 1-1/8" Hex—Serves Ford "6"; V-8 60 HP, 1937-'40; V-8, 1942 and Mercury.

No. V-132—Opening 1-3/8" Hex.—List Price, \$2.00

Serves all Ford cars and trucks 1928-'36; V-8 85 HP Motors, 1937-'41. Cut away for clearance.

WILLIAMS' AUTOMOTIVE SCREW DRIVERS

Regular Nos. 4 to 12

Regular Nos. 24 to 32

Electricians' Nos. 43 to 50

Regular Stubby
No. 62

Pocket No. 52

Phillips Stubby
No. WP-62

Phillips Nos. WP-1 to WP-4

Phillips No. CP-4

Williams' Regular, Electricians', Pocket and Stubby (adjusting) Screw Drivers are all fitted with handles of a tough transparent composition, an insulator of electricity. Fluted for sure, comfortable grip. The blades, hardened and tempered, are solidly anchored in the handles.

Regular patterns are available with either square or round blades. Electricians' have round blades and the Stubby a square blade. The Pocket has round blade and is fitted with pocket clip, as illustrated.

FOR PHILLIPS RECESSED-HEAD SCREWS

Williams' Screw Drivers, Nos. WP-1 to WP-4, will fit the entire range of Phillips recessed-head screws. These, and the Phillips Stubby (adjusting) Screw Driver, have round chrome-alloy blades, hardened and tempered, that are securely anchored in superior hard wood, fluted handles.

The No. CP-4 Phillips Screw Driver has a transparent composition handle and a blade that is hexagon for more than half of its length. This permits the use of a wrench for added leverage.

All Screw Drivers packed 6 in cardboard box, excepting No. 52, 12 per box.

WILLIAMS'
"SUPERPLIERS"—SLIP JOINT
(Chrome-Alloy)

QUALITY TOOLS

No. 1519
List Price
\$1.85

Drop-forged from special Chrome-Alloy steel and heat-treated. The bolt affords the greatest strength possible in thin slip-joint construction.

No. 1519, midget size (4-1/2" long), is especially designed for use in connection with distributors, ignition systems, wiring, panels, switchboards, radios, carburetors, etc. and the innumerable jobs requiring small pliers with thin, slim jaws.

The 4-position slip-joint provides openings up to 9/16", with the jaws parallel at the most important openings. The slightly flared ends of the handles give ideal finger control. Cadmium plated.

No. 1520, length 9-1/2", is particularly serviceable in adjusting packing-gland nuts on practically all cars, trucks, tractors and the smaller industrial engines. 8-position, slip-joint. Since the jaws close entirely, they grip any thickness up to their capacity — 2 inches.

The knurled handles provide a firm hand grip, even if greasy. Gray satin finish, faces polished.

No. 1520
List Price
\$2.20

Fully Guaranteed

WILLIAMS'

AUTOMOTIVE CHISELS

Cold, Nos. C-8 to C-36

Rivet Buster, No. C-422

COLD, or FLAT PATTERN

Williams' Chisels are made from high grade octagon alloy steel noted for its fine cutting qualities and durability; carefully forged, hardened and tempered. Ample hard for work on tempered material, yet soft enough to minimize chipping and to permit re-sharpening with a file. Body finished in black with full polished bit and head.

RIVET BUSTER

Designed especially for cutting off hardened rivet heads, this tool is particularly useful in dismantling old cars. It is a great time saver when used for this purpose, instead of the ordinary cold chisel.
